

# KORMARAN K7

SEA

215

DONNÉES GEO

This hydrofoil speedboat is designed to be a Bugatti and a Gulfstream combined, but on the water. Pack your best trunks and laminate your life insurance certificate.

A shapeshifter of Marvel superhero dimensions, this craft can morph into a monohull, a catamaran, or a trimaran thanks to electronically controlled actuators that reposition the hull pontoons. The Bathing Mode lifts the 11-foot, 5-inch-wide teak platform from the sides to the centre of the boat, affording the owners the space to lie down and take in the sun. Night Mode, which activates red LED lights and aquamarine strip lighting, provides the perfect ambience for sitting at anchor and watching the stars.

The K7 utilizes Formula One composite technology and Q-branch imagination to produce a craft custom-matched for buzzing between parties at the Monaco Grand Prix and setting off for a mission in the Mediterranean.
