Austrian company **Kormaran** will unleash their latest project, a gorgeous limited edition tender called **Kormaran K7**, at the 2016 Monaco Yacht Show. Actually, the K7 will be revealed on the evening before the start of the event, showing off a majestic design, imagined with ultimate comfort and safety in mind.

Inspired by the automotive and aviation industries, this stunning project features the latest technological advancements, and an impressive 900-hp engine configuration, which will offer an enjoyable ride and some high speed thrills, while taking passengers to the best sunbathing spots.

This elegant multi-purpose day-boat has a top speed of up to 50 knots in its powerboat configuration, while the hydrofoil version will do 40 knots, that's more than enough to make you go gaga.

Promising a breathtaking experience, the Kormaran K7 will set you back between €1,200,000 to €2,500,000, dependending upon configuration and levels of personalization, with special features including different hulls, ROTAX 300 hp engines, a new exhaust system and a new transmission system as well.

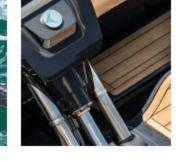

The K7 First Edition is a high-end luxury product, with only 50 personalized masterpieces scheduled to be delivered in the next years. For that kind of money, you could probably buy a small fleet of supercars, but this tender is something else, and we're sure it's totally worth every single penny.
