THE SUPERYACHT TENDERS & TOYS GUIDE 2014

KORMARAN

The Kormaran – A new class of boat. While conventional boats cannot change their driving characteristics, the KORMARAN can transform even while driving. The KORMARAN elegantly combines the agility of a monohull for quick manoeuvres, with the stability of a catamaran or trimaran. In addition, the KORMARAN can gracefully transform into a large bathing platform. The use of hydrofoils expands the vision of the KORMARAN. The advantages are obvious – higher speeds with lower energy consumption and a much more comfortable ride, thanks to the decoupling of the waves. Carbon fibre with automotive standards and integrated Formula 1 technology, coupled with lightweight aircraft technology and the latest security features, make the KORMARAN a high-tech watercraft with the highest requirements.
